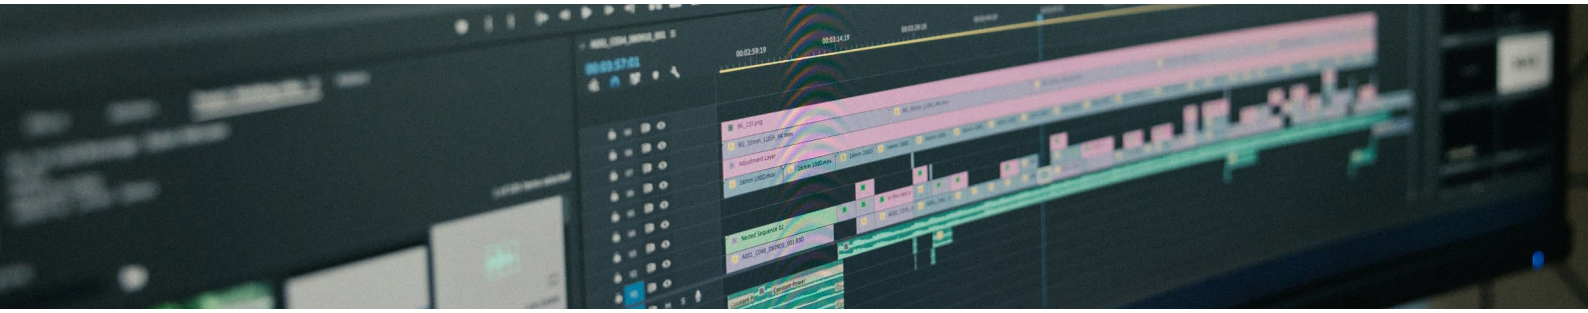
Strategic Sound & Vision

Post-Production *Checklist*



Post-production is where your project comes to life. Editing, mixing, and polishing can make the difference between a good project and an outstanding one. A checklist keeps this complex stage organised and efficient.

Key Steps in Post-Production

- **Review all footage/audio.** Ensure all clips are usable and complete.
- **Sync & clean audio.** Remove background noise and balance levels.
- **Edit for clarity & flow.** Cut redundancies, tighten pacing, and enhance storytelling.
- **Add music & effects.** Complement visuals without overpowering content.
- **Colour grading & graphics.** Ensure visuals match the tone of your brand.
- **Final review & feedback.** Allow stakeholders to review before final render.

"Post-production is where the story truly takes shape. Get it right and your project shines."

Practical Checklist

- ☐ All clips imported & organised
- ☐ Audio cleaned and levelled
- ☐ Video editing complete
- ☐ Music & SFX added
- ☐ Titles & graphics integrated
- ☐ Final export delivered

Common Pitfalls

- Missing backup copies
- Ignoring audio/video sync issues
- Overcomplicating edits or effects
- Last-minute changes that derail deadlines

With a clear post-production process, deadlines are met, and results are polished. **Cyrius MediaWorks** supports every step to deliver professional, finished content.
